## CONDUCT & ENVIRONMENT

Social Responsibility is in our DNA and therefore it is included as an integral component in every process, every project, every product that carries our name.

Our Code of Conduct is based on UN Global Compact's 10 principles which are based on internationally adopted declarations and conventions on human rights, labour rights, environmental protection and anti-corruption.

TEE JAYS does not own any factories, but we cooperate with suppliers that understand the importance of complying with the guidelines of our Code of Conduct about the ethics and behaviour throughout the supply chain.

All TEE JAYS products are covered by STANDARD 100 by OEKO-TEX® which is one of the best-known labels for textiles and guarantee that the clothing does not contain harmful substances. It is the world's leading independent testing institutes and regularly controls all testing for substances which are harmful to human health and the environment. Clothing that carries the STANDARD 100 by OEKO-TEX® label is subject to requirements covering pH value and the content of, for example, pesticides and heavy metals.

The Organic Content Standard (OCS) verifies the presence and amount of organic material in a product and tracks the flow of the raw material from its source to the final product that contains 95-100 percent certified organic cotton. This Global independent certification ensures organic value of our products.

OCS Blended is in similar way the certification that verifies and value the organic content in products mixed with synthetic or conventional materials.

TEE JAYS is member of Amfori, the leading global organisation for open and sustainable trade. Amfori unites more than 2000 companies committed to improving working conditions and environmental condition in the global textile production. By that also supports us in monitoring a constant high level in the nominated factories producing TEE JAYS products.
